

Lesson 22 2D Array Part 2

—|

- 2D Arrays are initialized using **curly braces { }** each group followed by **commas**.

Example:

- Declare a 2D array of dimension **4 rows** and **5 columns**

↓ ↓
Groups students

```
int x[4][5] = {  
    {47, 20, 35, 40, 30},  
    {48, 32, 42, 49, 42},  
    {48, 36, 49, 25, 38},  
    {58, 47, 46, 28, 23}  
};
```
